The Acumed Visiting Surgeon Program provides a unique opportunity for physicians to visit our global headquarters to learn about our company and the products we design and manufacture.

This educational experience provides an interactive learning environment that helps promote positive outcomes for physicians and patients. Each program is tailored to ensure that the physician leaves with a lasting impression of our company and products.
Each visit provides hands-on use of our entire current product line in Acumed’s state-of-the-art cadaveric training lab. A variety of other activities are offered to enhance the learning experience. Surgeons will tour our plant to see Acumed’s superior manufacturing process and the attention and detail that goes into making our products. They will also meet with Acumed product managers and design engineers as well as members of the executive team.

Our Mission

“To aid the afflicted through the ingenuity of our minds, the labor of our hands, and the compassion of our hearts.”

Our Vision

To be our customers’ first choice for innovative extremity and trauma solutions that enhance the surgical experience and improve patient outcomes.

Medical Education is a key pillar that enables Acumed to further our mission and fulfill our vision.

We offer world-class education and provide enhanced learning experiences for attending surgeons, fellows, and residents in both the upper and lower limb.

The Visiting Surgeon Program is one of the many innovative offerings that enhance the customer experience with Acumed products.

A new feature of the program is an interview in our new multimedia studio. Surgeons are invited to speak about a favored approach, a challenging case, insight found through research, or other topics. The resulting content is highlighted on our social media and digital channels.
Please note that while Acumed is devoted to innovation, we strongly encourage that product ideas be routed through the proper channels. If you have a new product idea, please visit the Acumed [www.acumed.net/about-acumed/innovate-us](http://www.acumed.net/about-acumed/innovate-us) page and complete the Innovate With Us form.
